HOTEL NIKKO SAN FRANCISCO ANNOUNCES NEW INTERNET AND TECHNOLOGY UPGRADES COMING THIS SUMMER

Upgrades to include faster streaming, greater bandwidth and complimentary internet

SAN FRANCISCO (June 1, 2015) – Today, **Hotel Nikko San Francisco**, one of the Bay Area’s foremost hospitality leaders in innovation and technology, announced new internet and technological upgrades to be available throughout the property this summer. Some of the new features and upgrades include faster streaming and greater bandwidth capabilities (300mbps) throughout Hotel Nikko’s meeting spaces and banquet halls, as well as faster streaming (200mpbs) within all guest rooms. Additional speed opportunities (over 500 mbps) are available upon request throughout the hotel and its various meeting, dining, and entertainment spaces.

Along with new, innovative technology upgrades, Hotel Nikko San Francisco will also be offering complimentary guestroom basic internet access starting this June, with a premium upgrade option for more bandwidth and faster video streaming available for a small fee.

Vice President and General Manager, **Anna Marie Presutti** states, “Our goal is to consistently surpass our guests’ expectations to provide a better experience. For today’s travelers, high-speed internet access is as expected as oxygen. We are proud to offer 400 Mb/sec bandwidth, which places Nikko San Francisco on the leading edge of internet speed in the hospitality industry.”

Below is a comprehensive list of all internet and technology upgrades coming to Hotel Nikko San Francisco this Summer:

Meeting Room Network Upgrade

- Continue using existing Cisco 2921 router
- Install new 2960X gigabit switches for gig uplinks to IDFs
- Continue using existing 2960 switches in remaining IDFs
- Install new wireless network with (14) 3702I dual-band 802.11ac access points (+3 spare)
- Continue using existing 5508 WLC to manage wireless network

Features and Benefits

- This upgrade is designed to increase density and bandwidth throughput, allowing more devices to connect and perform more seamlessly with rich content
- This upgrade also prepares the hotel for the next generation of 802.11ac by offering gigabit uplinks throughout the IDFs
- Cisco ClientLink 2.0™ Beamforming: Ensures efficient and reliable mobile connections
- Inherently runs Cisco CleanAir™ Spectrum Intelligence: Automatic interference reduction
- 3x4 MIMO: allows greater range, reliability, and more capacity per access point.
